

My comment originally filed included an error.

I am NOT in favor of this RuleMaking being adopted.

This erratta is to clarify my intent.

Lloyd Mitchell
Florence SC

The below comments are my final issuance on this matter.

In Reference to RM-10868,

This proposal is WITHOUT MERIT and should be dismissed without action.

There is no valid reason to retain this requirement for licensing and testing for this one class of license.

Retaining the 5WPM testing requirement places unnecessary requirements upon the FCC, VEC and the testing applicant that has no bearing on the technical aspects of the hobby.
